

Communication and Language

We will talk about our families, bodies, feelings and ways to keep healthy. The children will learn key vocabulary such as the names of key parts of the body and family members.

Personal, Social and Emotional Development

We will work on building relationships with others in the class through continuous provision, role play and circle time. The children will begin to develop independence in their own personal hygiene throughout the day.

Literacy

We will begin our daily phonics sessions, learning new sounds and practising blending and segmenting with them. We shall re-tell familiar stories such as 'Dear Zoo', talk about pictures in our reading books and start to write simple words by segmenting.

Physical Development

We will talk about and practise various ways to keep safe in the school hall during our PE lessons. The focus will be on developing the fundamental skills such as balancing, running, stopping, changing direction, jumping and hopping.

Mathematics

We will be practising the skills of matching, sorting and comparing numbers. We will learn and practise using the vocabulary related to size, weight and capacity using practical resources and start to look at pattern.

Understanding of the World

Through images and photos, we will compare different families, talking about the similarities and differences. We will think about how doctors, dentists and other members of our community help us.

Expressive Arts and Design

The children will pencil draw their own family, practise their scissor control, use natural materials in their work and we will practise singing various songs together.
